Hiring Team
Dua Minds

Subject: Application for Junior Full Stack Developer

Dear Hiring Team,

My name is Nafisha Nowshin Tisha, and I am writing to express my enthusiastic interest in the **Junior Full Stack Developer** position at **Dua Minds**, which I found on LinkedIn. As a Computer Science & Engineering student at **BGC Trust University Bangladesh**, I have developed a strong passion for building modern, scalable, and user-friendly web applications using contemporary web technologies.

During my development journey, I have built a solid foundation in both frontend and backend development. One of my most notable projects is **TutorHub**, a comprehensive full-stack tutoring platform built with **Next.js, Node.js, Express.js, and MongoDB**. In this project, I implemented **JWT and Google Authentication**, developed secure **RESTful APIs**, created responsive and intuitive user interfaces, and designed a seamless session booking system. Through this experience, I strengthened my skills in frontend development, backend architecture, API integration, database management, and responsive web design.

I also have practical experience working with **HTML, CSS, Tailwind CSS, JavaScript, TypeScript, React.js, Next.js, Node.js, Express.js, MongoDB, and MySQL**. I enjoy creating clean, accessible, and responsive user interfaces while writing maintainable code that delivers an excellent user experience. I am always eager to explore new technologies and continuously improve my development skills.

What excites me most about **Dua Minds** is your collaborative culture, focus on creativity and innovation, and the opportunity to work with international clients. I am particularly drawn to your emphasis on developing custom web solutions, contributing ideas for new technologies, and collaborating across UX, frontend, and backend development. As a fast learner with strong problem-solving abilities and attention to detail, I am confident I can quickly adapt to your workflow and make meaningful contributions to your team.

Thank you for taking the time to consider my application. I would be honored to contribute my technical skills, enthusiasm, and dedication to Dua Minds. I have attached my resume for your review and would welcome the opportunity to discuss how my background and passion for full-stack development align with your team's goals.

I look forward to hearing from you.

Sincerely,

Nafisha Nowshin Tisha
